Skanderborg August 30, 2021

ETK EMS Group – new co-owner

Blue Equity will enter into the ownership of ETK EMS and support the foundation for new ambitious target for the company

The electronic manufacturing company ETK EMS supports a wide variety of companies within industries in climate technology, IoT, robotics, wind power, healthcare/medico, transportation, automotive and entertainment. ETK EMS is being production and logistical partner for their customers utilizing their global footprint.

ETK EMS, with headquarter in Skanderborg, Denmark supports customers both domestic as well as international. The company has been in a strong and positive development for years and by extraordinary mindset and structure created a company not only being the strongest within its industry but probably also among the country's leading within digitalization. More than 320 employees spread out on the 3 locations in Denmark and Thailand create together a strong organization being capable of delivering unique and optimized logistical solutions within electronic manufacturing services (EMS).

VP & Partner Torben Drejer points out that our wish for the future of ETK EMS is to continue the positive development of the company where we are naturally selected as being an attractive partner for our present customers and at the same time escalate the company further and win market shares. This is why the present owners of the company have decided to invite a new strong partner inside. This new partner, Blue Equity, will provide knowledge and competencies for the benefit of the company and will be essential for the planned growth in all perspectives. Blue Equity is a brilliant match for ETK EMS not only by being a strong financial partner but also due to the unique mentality of their group of investors. The ownership of Blue Equity is based on Danish companies and investors having a mindset of long-term investments where the objective is to make good companies even better, Torben Drejer comments.

Christian Møller, Managing Partner at Blue Equity, adds; -We are incredibly proud that we are now part of ETK EMS. Blue Equity has become acquainted with a company being extremely strong in their field handled by a dedicated and innovative management and very competent and loyal employees. We look forward to participating in developing ETK EMS in the years to come.

The ownership of ETK EMS will in the future be the two present owners, Thomas Vinter and Torben Drejer together with the new majority shareholder Blue Equity.

The new ring of ownership still need approval by the Danish Competition and Consumer agency (Danish Antitrust Authority). Any questions to this press release please direct to:

Blue is a leading investor for partnership investments in Danish SMEs. In close cooperation with management, Blue Equity provides network, knowledge and capital in order to create value during the ownership period. Return on investment is generated by making good companies better. We establish partnerships with the management teams and owners to secure the mutual development of well functioning companies. We are flexible in regards to ownership structure and are willing to assume minority ownership positions. The companies must be mature, well-functioning and have potential. www.blue.dk
